Cairo, Egypt

PROFILE

Frontend Developer and Team Lead with 4+ years of experience building scalable enterprise web applications using Vue.js and TypeScript. Specialized in ERP systems, real-time dashboards, data visualization, and interactive maps. Experienced in leading frontend teams, conducting code reviews, mentoring developers, and delivering solutions for clients across Egypt, Saudi Arabia, and Kuwait.

SKILLS

Languages & Markup:	HTML5, CSS3, SCSS, JavaScript, TypeScript
Frameworks:	Vue.js 2/3, Pinia, Vuex, React, Next.js, Nuxt, Responsive Design, Tailwind CSS
Data & Visualization:	WebSockets, Real-Time Dashboards, Charts & Analytics, Interactive Maps, PDF/Excel Export
Tools & Backend:	Git, GitHub, Docker, REST APIs, Node.js, MySQL, GitHub Actions
Soft Skills:	Team Leadership, Code Review, Mentoring, Task Planning, Agile Collaboration

WORK EXPERIENCE

Middle East Advanced Industries Co. | Mechatronics Apr 2025 – Present

Senior Frontend Developer & Team Lead

- Architected modular, component-based codebase for Tera ERP — a fully customizable dynamic ERP system.
- Led the frontend team: code reviews, design validation, server update coordination, and task assignment.

Stack: Vue.js 3, ERP Systems

Restart Technology Apr 2024 – Apr 2025

Frontend Developer → Senior Frontend Developer

- Kosoor**: Saudi Zakat & Tax Authority-compliant e-invoice accounting software. Grew to senior role handling code reviews and junior mentoring.
- WashThru ERP**: Enhanced UI and integrated new features for an automated car wash manufacturing ERP.

Stack: Vue.js 3, ERP Systems, E-Invoicing

OnCall (Remote – Kuwait) Sep 2023 – Apr 2024

Frontend Developer

- Platinum Gym System**: Built gym management platform — member tracking, trainer schedules, branch admin dashboards, and detailed reporting.

Stack: Vue.js

Vegadata Tech. Feb 2021 – Aug 2023

Frontend Developer → Frontend Team Lead

- EGX Fraud Detection (Egyptian Exchange): Real-time WebSocket dashboard with live charts, data tables, and PDF/Excel report exports.
- Road Safety Dashboard (Saudi Arabia): Interactive accident-hotspot maps identifying high-risk zones and causes. Also assisted with Django backend.
- Momrah – Ministry of Municipal Affairs (Saudi Arabia): Government KPI portal with charts, tables, and geographic map layers.
- Fattuta**: Consumer price-comparison app. Led the frontend team — task assignment, code review, and delivery.

Stack: Vue.js 2/3, TypeScript, WebSockets, Charts, Interactive Maps, Django

KEY ACHIEVEMENTS

- Led frontend teams across multiple enterprise and governmental projects.
- Built real-time dashboards handling live data visualization and reporting.
- Delivered ERP and e-invoicing systems for clients across Egypt, Saudi Arabia, and Kuwait.
- Specialized in scalable frontend architecture and reusable component systems.

EDUCATION

Cairo University — Faculty of Computers & Artificial Intelligence Sep 2015 – May 2020

B.Sc. Information Systems | Graduation Project: A+
